**REQUEST FOR KEY DECISION 2 FOR THE OPERABLE UNIT 4 (OU4)
REMEDIATION PHASE I PROJECT, AMENDMENT 1 - SRK-079-94**

This letter formally amends the request for Key Decision 2 (KD2) for the Phase I Remediation Project (reference S R Keith letter 94-RF-02646, to F R Lockhart, dated March 3, 1994). KD2 approval to start Title II design is requested only for installation of the security access gate at Portal 3. A detailed scope and estimate has been completed for this activity. This effort is a non-closure related activity.

Due to the simplistic nature of the design and in order to meet the aggressive Interagency Agreement (IAG) milestones and the construction acceleration goals, Title I will not be performed. Accordingly, Title II design will need to start no later than May 17, 1994 in order to achieve our "bias for action" goals.

Additionally, approval to start Title II design prior to completion of the National Environmental Policy Act (NEPA) process was formally granted by your office (reference F R Lockhart letter to S R Keith, 04228, dated April 14, 1994)

Please obtain concurrence from your counterpart in DOE, RFFO, Project Management Engineering, as appropriate, prior to approval of KD2 for these activities

If there are any questions or concerns regarding this project, please contact Andy Ledford at extension 8673 or digital 5338.
